SUPERTEAM BRASIL

WHO WE ARE

a talent layer da **Solana** no Brasil.

Superteam Brasil é um coletivo de builders — devs, designers, founders e criadores — que ganham, aprendem e constroem juntos no ecossistema Solana. A gente conecta talento brasileiro às melhores oportunidades on-chain.

01

Bounties

Trabalhe em projetos reais e ganhe em USDC.

02

Hackathons

Construa, faça ship e mostre pro ecossistema.

03

Grants

Financiamento pra levar sua ideia ao mainnet.

The mark

superteam BRASIL lockup

The **symbol** stands alone for avatars, favicons and social marks — wherever the name already appears nearby.

Clear space & don'ts. Keep clear space around the mark equal to the height of the symbol's counter. Never stretch, rotate, recolour outside the palette, or add effects.

Ganhe em USDC. Aprenda fazendo. Conecte com builders. Superteam Brasil é a talent layer da Solana no Brasil — bounties, hackathons e grants para quem constrói o futuro on-chain.

Organic shapes

the "morth" library

Use them **large** — full-bleed or bleeding off the edge — as background decoration, containers, or oversized bullets. They intentionally break the grid. Don't outline, add shadows, or shrink them into tiny icons.

How we talk

Portuguese-first

Brazilian PT, crypto-native. Mixed PT/EN is on-brand — keep bounty, hackathon, grant, ship in English.

Peer-to-peer

Speak with the community — "a gente", "você", "bora" — never a distant corporate "the company".

Action-led

Lead with verbs: participe, construa, ganhe, aprenda, conecte. Short and punchy.

Warm casing

Headlines lowercase or sentence-case. ALL-CAPS only for short labels and the BRASIL lockup.

"Bora construir na Solana."

Let's build on Solana.

"Ganhe em USDC. Aprenda fazendo. Conecte com builders."

Earn in USDC. Learn by doing. Connect with builders.
